

Stunning 24-inch wide format display for the ultimate viewing experience

## HP LP2465 Flat Panel Monitor

Designed for workstation and high-end business users, the HP LP2465 Flat Panel Monitor is equipped with cutting-edge technology and a host of advanced presentation features. With up to 1920 x 1200 resolution you can enjoy crystal clear images on stunning 24-inch viewable screen. This innovative display also features a number of additional high performance features including the HP Display Assistant to ensure exceptional visual comfort and simplified asset management.

### Advanced visualisation features

Flat screen technology simply doesn't get much better than this – an ultra-bright display with 1000:1 contrast ratio and 178° viewing angles means superior screen clarity you can enjoy from almost anywhere. A lightening-fast 6 ms response time helps to ensure crisp, clear viewing of images and text. The anti-glare coating and flicker-free image meet stringent TCO 03 requirements helping to reduce eyestrain and fatigue.

### HP Display Assistant

To enhance your viewing experience the HP Display Assistant software utility allows monitor adjustment, colour calibration, and security/asset management to be handled through the graphical interface on your connected PC. For added flexibility any changes can be made locally or over a network.

### Uniquely versatile mounting feature

The new HP Quick Release is a secure and easy-to-use mounting solution that allows you to attach your monitor to a variety of stands, brackets and other VESA-compliant devices. Ideal for use in store fronts, office reception areas, trade shows and medical and institutional settings.

### User-friendly functions and superior ergonomics

A height-adjustable base and a 90-degree pivot capability for portrait or landscape viewing make it easier to achieve comfortable eye contact with the screen. Super-thin bezels let you 'tile' multiple panels together for panoramic viewing of large amounts of data and information. HP Display LiteSaver technology helps to increase monitor life and reduce power consumption with pre-scheduled low-power 'Sleep' modes.

# HP LP2465 Flat Panel Monitor

<b>Type</b>	Active Matrix TFT (thin film transistor); Anti-glare and anti-static coatings
<b>Viewable image area</b>	24 inches diagonal
<b>Viewing angle</b>	178° horizontal, 178° vertical
